Sir:

I, Walter M. Douglas, an attorney of record for the above-captioned application, hereby declare that:

The present Application No. 10/723,372, filed November 25, 2004, is a division of U.S. Patent No. 6,699,408, formerly Application No. 10/122,266, filed April 11, 2002.

To the best of my knowledge and belief, Corning Incorporated, duly organized under the laws of the State of New York and having its principal place of business at Riverfront Plaza, Corning, New York 14831, is the only assignee of the entire right, title and interest in and to the above-identified application, Serial No. 10/723,372, filed November 25, 2003 (11/25/2003) for FLUORIDE CRYSTALLINE LITHOGRAPHY LENS ELEMENT BLANK, in the name of Corning Incorporated, as indicated by assignment(s) duly recorded in the United States Patent and Trademark Office at Reel No. 011736, Frame Nos. 0133, recorded April 16, 2001 and is and at all times was the only assignee of application Serial No. 10/122,266, filed April 11, 2002 (now U.S. Patent No.

6,699,408), for METHOD OF MAKING A FLUORIDE CRYSTALLINE OPTICAL LITHOGRAPHY LENS ELEMENT BLANK in the name of Corning Incorporated, as indicated by assignment(s) duly recorded in the U.S. Patent and Trademark Office at Reel No. 011736, Frame No. 0133, recorded April 16, 2001.

Both the above cases are divisional application based on the parent case file as U.S. application Serial No. 09/835451, Now U.S. Patent No. 6,395,657. The assignment is also duly recorded in the U.S. Patent and Trademark Office at Reel No. 011736, France No. 0133, recorded April 16, 2001.

I further represent that I have reviewed the evidentiary documents establishing the assignments and certify, that to the best of my knowledge and belief, title to the above-identified application and the United States Patent No. 6,699,408 are in Corning Incorporated.

To obviate a double patenting rejection, Petitioner, Corning Incorporated, hereby disclaims, under the provisions of 37 C.F.R. § 1.321, the terminal part of any patent granted on the above-identified application, Serial No. 10/723,372, which would extend beyond the expiration date of the full statutory term including any extensions of the original term, of Patent No. 6,699,408, issued on May 2, 2004. As used herein, the term "extension" includes the increase in the current seventeen year term of patents under the Uruguay Round Agreement Act, which provides that the term of patents in force on June 8, 1995, extends to the longer of 20 years from the patent's filing date or 17 years from its issue date. Petitioner hereby further agrees that any patent so granted on the above-identified application shall be enforceable only for and during such period that the legal title to said patent shall be the same as the legal title to United States Patent No. 6,699,408, this agreement to run with any patent granted on the above-identified application and to be binding upon the grantee, its successors or assigns.
